

PLASTIC AUDIT & COMPLIANCE EVALUATION REPORT

Institution: KIET Group of Institutions
Cycle: Q2 FY 2026-27 Compliance Evaluation
Date Generated: 31 May, 2026

1. Executive Performance Summary

Monitored waste audits: 78 logged entries. Total monitored weight is 1549.5 kg. Overall Sustainability Rating Index is: **48.9/100 (Red Tier (Non-Compliant / High Risk))**.

This RAG-grounded audit report provides a regulatory compliance and waste inventory evaluation for KIET Group of Institutions in Bengaluru Urban, Karnataka. The audit tracked 1,549.5 kg of plastic packaging. With a 66.6% recycling rate, the campus achieves a Sustainability Score of 48.9/100 (Red Tier (Non-Compliant / High Risk)). Major gaps in Rule 4/15 carry bag thickness and cafeteria single-use plastics require immediate remediation to satisfy CPCB and State Pollution Control Board mandates.

2. Statutory Gaps Analysis (PWM Rules 2016)

Rule	Req	Status	Gap
Rule 4(c)	Min carry bag thickness of 120 microns	■■ NON-CON FORM	Detected carry bags/package sheets with thickness below the legal limit of 120 microns (Total: 401.0 kg).
Rule 16 / NGT	Strict ban on open burning of plastic waste	■■ NON-CON FORM	Plastic waste is being incinerated via open burning, which is prohibited under NGT directives and PWM Rule 16 (Total: 62.0 kg).
Rule 15 / SUP Ban	Prohibition of banned single-use polystyrene cutlery/plates	■ Compliant	None

3. EPR Target Obligation Assessment

CPCB Bulk Generator Status: **Classified as Bulk Generator**. Monitored packaging EPR target weight: **1084.6 kg**.

EPR Category	Audited (kg)	Target Rate (%)	Required (kg)
Category I (Rigid)	554.5	70%	388.1
Category II (Flexible)	209.0	70%	146.3
Category III (Multilayered)	786.0	70%	550.2
Category IV (Compostable)	0.0	70%	0.0

4. 12-Month Action Roadmap

Month	Activities & substitution paths	Compliance Outcomes
Month 1-3 Policy Setup & SUP Ban	- Establish Sustainability Committee - Amend caterer guidelines to ban plastics under 120 microns	Outcome: 15% reduction in overall waste packaging volume Compliance: Resolves Rule 15 single-use plastic violations

Month 4-6 Segregation Bins & Training	- Install Blue/Green source segregation hubs - Conduct training workshops for sanitation staff	Outcome: Recyclable separation accuracy rises to 65% Compliance: Aligns facility operations with Rule 6 generator responsibilities
Month 7-9 SPCB Recycler Partnerships	- Partner with SPCB-registered recycling agents - Introduce waste-collection logs at the gate	Outcome: Diverts 35% of waste from municipal landfills Compliance: Establishes validated EPR audit trails
Month 10-12 Zero-Waste Certification	- Perform secondary follow-up compliance checks - Apply for SPCB Green Campus Certification	Outcome: Achieves Gold/Platinum tier rating status Compliance: Full verification audit confirmation

Report Annexures Section

Annexure A: Raw Monitored Audit Dataset

Date	Resin	Weight (kg)	Disposal
2026-05-31	1	45.0	RECYCLED
2026-05-31	1	32.5	RECYCLED
2026-05-31	4	18.0	LANDFILLED
2026-05-31	4	22.0	LANDFILLED
2026-05-31	7	15.0	INCINERATED
2026-05-31	7	28.0	RECYCLED
2026-05-31	7	19.5	RECYCLED
2026-05-31	7	12.0	LANDFILLED
2026-05-31	7	8.5	LANDFILLED
2026-05-31	7	7.0	LANDFILLED
